Krisztina Andreyka

Education

Budapest Corvinus
University
2012 - 2017

Horticultural Engineer
Horticultural Science

Language

English
B2

Communication level

Work Experience

Wizz Air
2020 Aug -

I work as a Software Test Engineer. I have to manual-test the WizzAir website on desktop and on mobile as well. We use Azure to manage daily tasks like writing test cases and documentation. Among my responsibilities I have to run test cases, support the bi-weekly release cycles and I do frequent regression testing.

CandidITS
2019 Apr - 2020 Aug

I was part of the R&D team which developed an intelligent, license plate identification module. My tasks involved image processing, data processing and assistance. As part of my responsibilities I had to conduct the training of some external workers after which I had to control their remote work and keep contact with them. I independently implemented some simple Node.js scripts to help my work on other tasks and I made an internal web application in React which helped to summarize license plate categories in a data table. Alongside the main project I was supporting some internal software projects where I did manual testing and wrote the software specification for them.

Agro Masini Kft.
2018

It is a company founded by my family. We are doing fruit cultivation where I managed to get experience about organizing work and production.

BKV Zrt.
2017

I was doing student work at BKV Zrt. „Beszerzés Irányítási Osztály” as an office administrative assistant.

Personal

- I am actively improving my programming skills
- My portfolio: krisztiandreyka.me
- I am confident in using the Microsoft and Atlassian products
- Interested in
 - ◆ JavaScript
 - ◆ React.js
 - ◆ Node.js
- I respect the deadlines
